DETAILED ACTION

The application has been withdrawn from issue in light of the prior art reference submitted Oct 25, 2004 by the applicant.

The amendment filed under 37 CFR 1.312 dated Oct 21, 2004 has not been entered because claims 17 and 18 are not pending.

The Information Disclosure Statement dated Jun 14, 2004 has been considered.

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
2. Claims 12, 14, and 16 recite the limitation "said dummy region" in line 2. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

2. Claims 11, 12, 13, 15, and 16 are rejected under 35 U.S.C. 102(a) as being anticipated by Hirabayshi (US 5,614,445).

With respect to claims 11, 12, 13, 15, and 16, Hirabayshi teaches a semiconductor integrated circuit device comprising (see figs. 1-4 and associated text):

Art Unit: 2814

trenches 4', 6' formed in a semiconductor substrate 1,2 and defining active regions and dummy regions; and
element isolation insulating films 8, 8a buried in said trenches to serve as element isolation regions, wherein said dummy regions are formed at a scribing area and wherein a length of one of said dummy regions is shorter than a distance between external terminals 17a, 17b.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 14 is rejected under 35 U.S.C. 103(a) as being unpatentable over Hirabayshi (US 5,614,445).

With respect to claim 14, Hirabayshi appears to fail to teach that bonding pads are formed at the external terminals.

However, the formation of bonding pads at external terminals to provide connections between external terminals is well-known to one skilled in the art of making semiconductor device.
